DRONE POLICY

**IF YOU ARE CONSIDERING ADDING A DRONE TO YOUR PACKAGES,
PLEASE TAKE NOTE OF MIGHTY FINE'S INTERNAL DRONE POLICY.**

As per regulations, we are prohibited from flying a drone within 50m of any buildings or people, and the drone may never leave our line of sight.

Furthermore, we will not be able to fly the drone within a 15km radius of any airport or other no-fly zones. Local weather conditions also affect the drone operation and may prevent us from taking footage.

We will always do our best to get the footage we need on the day of the wedding, however it is at the operator's discretion whether the specific circumstances on the day are safe to fly in. Don't worry though, if we can't get the footage we need on the day, we'll do our very best to go back and shoot it under more favourable conditions.

A romantic wedding scene by a lake with mountains in the background. A bride in a white gown and a groom in a black suit are standing on a grassy bank, holding hands. The background features lush green trees and majestic mountains under a soft sky.

THE TEAM

Mighty Fine Productions is a leader in the wedding industry, boasting years of experience and a ton of specialised expertise in a variety of the wedding-related fields. Our combined team has received numerous awards within the video production world and are regularly engaged in different kinds of video productions, which has prepared us to work in a variety of (sometimes challenging) circumstances. From beginning to end, you are in the hands of a dedicated set of planners and coordinators, camera operators and editors, each giving specialised, individual attention to their area of expertise. We have developed a detailed system over the years, ensuring that each video receives the attention it needs: this system allows us to have dedicated people work in the area of their strengths, instead of having just one person on every project.

Our in-house wedding coordinator will assist you with your programme for the big day, share some valuable information regarding our services and give you great tips and suggestions. We aim to make every step, leading towards your wedding day, pleasurable.

EQUIPMENT & SHOOTING STYLE

We continually upgrade our equipment to stay at the forefront of DSLR technology, and also add different types of slow-motion cameras where necessary.

We love flying drones over beautiful locations, and use high-quality sound recorders to capture the sounds of your wedding day too.

Our shooting style is cinematic and creative; capturing a variety of candid moments while focusing on aesthetically engaging the couple and their surroundings.

EDITING

Approximately half of all the effort we put into your wedding takes place after the big day. In the post-production process, we work hard to convey the atmosphere and story of your wedding day in all of the edits, as opposed to statically documenting a series of events. We bring your perfect memories to life, allowing you to relive and to share every special moment of your day.

DELIVERY

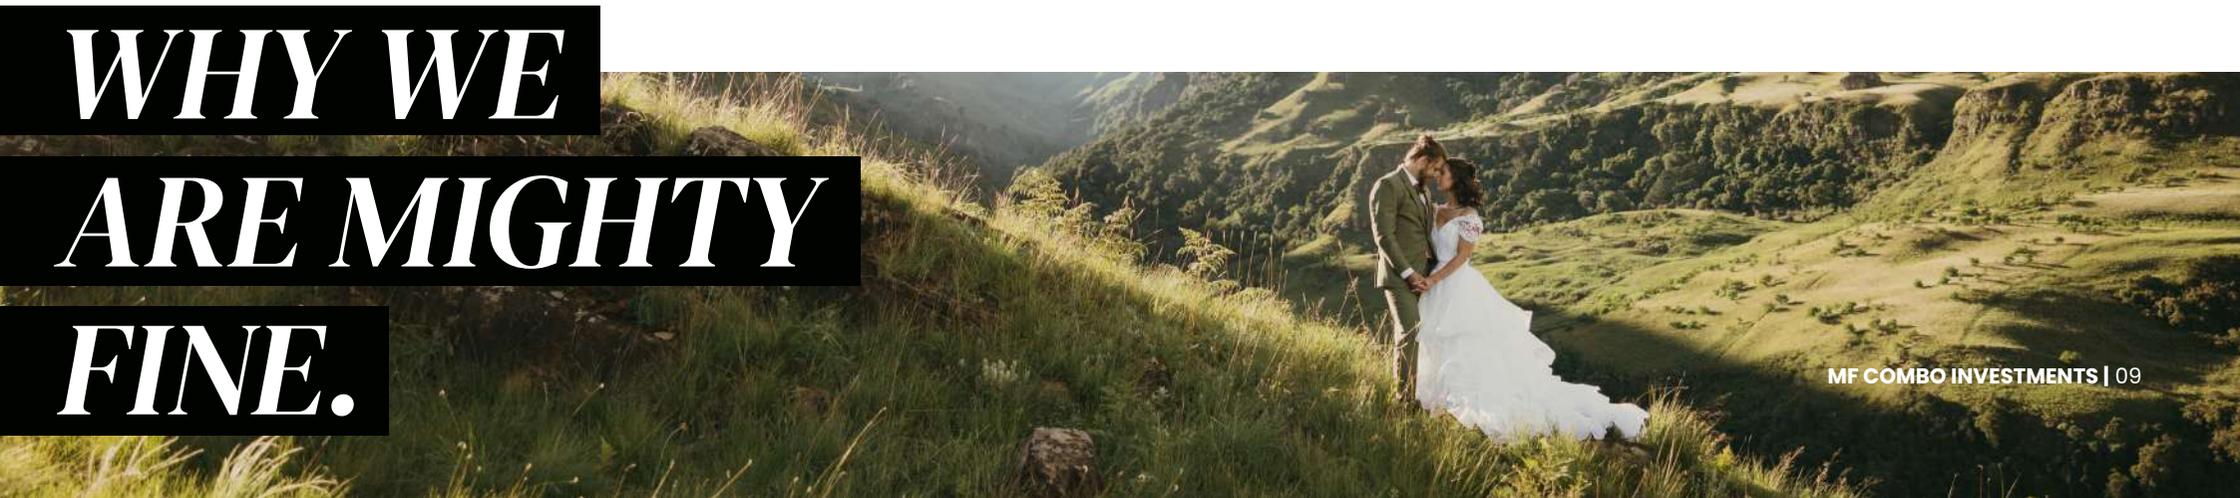

Following your wedding, you will receive all your videos via a link - making it easy to share with family and friends.

Unfortunately, DVD delivery is never an option.
